

cl::Sampler::operator=

```
graph LR; A[cl::Sampler::operator=] --> B[cl::detail::Wrapper::operator=]
```

The diagram illustrates a delegation of the `operator=` method. A gray box on the left contains the text `cl::Sampler::operator=`. A blue arrow points from this box to a white box on the right. The white box contains the text `cl::detail::Wrapper::operator=`, indicating that the `operator=` method of `cl::Sampler` is implemented by delegating to the `operator=` method of `cl::detail::Wrapper`.

cl::detail::Wrapper
::operator=
